EDUCATION

University of Pennsylvania, Weitzman School of Design | Master of Urban Spatial Analytics 05/2026
Core Courses: Public Policy Analysis; Data Science in Python; Spatial Statistics and Data Analytics; Geospatial Cloud Computing
University of Toronto, Faculty of Arts & Science | Honours BSc in Mathematics and Economics 06/2025
Core Course: Statistics, Data Analysis, Linear Algebra, Calculus, Game Theory, Managerial Economics, Behavioral Economics

WORK EXPERIENCE

PHS, Product Management Lead, Philadelphia, PA 11/2025 – 05/2026
Philadelphia Tree Planting Planning & Request Interface

- Conducted end-to-end data analysis on municipal outreach initiatives using **SQL** and **Python,** tracking engagement rate, conversion rate, and channel attribution across email, social, and direct mail touchpoints to support city planning decisions.
- Presented data-driven findings and recommendations to city council and community stakeholders, translating complex analytics into clear business narratives that informed a **$500K municipal budget reallocation** toward high-performing outreach channels.
- Advised on audience segmentation and resource allocation strategy, **building propensity models** that improved response rate by **28%** and reduced cost per acquisition by **22%**, supporting more equitable outreach targeting**.**
- Built **self-service campaign dashboard** in **Tableau** for 150+ stakeholders, visualizing real-time **impressions**, **CTR**, **conversion rate**, and **ROAS** by audience segment and creative variant, reducing ad-hoc reporting requests by 60%.

Amap, Product Analytics Intern, Remote 10/2024 – 12/2024
Gaode Map (Amap)

- Extracted and analyzed **impression, click, and conversion** data for 200+ advertisers from petabyte-scale geospatial **data warehouse**, writing optimized **SQL** joins across 15+ tables to power weekly location-based advertising reviews.
- Delivered advertiser-specific optimization briefs based on CTR and ROAS analysis, translating location and user behavior data into actionable business insights that enabled the sales team to upsell 15% incremental spend ($300K) from top 10 accounts.
- Built an automated **campaign reporting** pipeline using **Python** and **Tableau**, replacing an 8-hour manual Excel process with a daily-refresh dashboard serving 50+ internal stakeholders.

Xijia Chuangzhi Data Technology Co, Project Manager Intern, Wuhan, Hubei 07/2024 – 09/2024
Zhejiang University Academic Warning Label System

- Designed **custom measurement strategies** for university clients, developing predictive models using **Python (scikit-learn)** to identify at-risk students with **85% accuracy**.
- Translated statistical analysis into **executive-level insights and business recommendations**, demonstrating a 12% improvement in graduation rate outcomes.
- Partnered cross-functionally with Product and Client Success teams to calibrate model thresholds, balancing **precision vs. recall** to optimize operational efficiency and detection coverage.

PROJECT

Philadelphia Housing Market & Property Valuation Analysis, Philadelphia, PA 09/2025 – 05/2026

- Analyzed **500K+ property,** transaction, demographic, and neighborhood records to evaluate Philadelphia housing market dynamics, identifying key property value drivers, geographic pricing patterns, and neighborhood-level market differences.
- Developed and validated a property **valuation model** covering ~80,000 residential properties, comparing multiple predictive approaches and achieving **R^2** of **0.70+** while translating model results into market and valuation insights for planning stakeholders.
- Built an **automated GCP/BigQuery data pipeline** and **interactive decision-support tools** enabling stakeholders to evaluate property values, comparable properties, price segments, and spatial patterns across the city.

Elephant Habitat Suitability Model, Philadelphia, PA 09/2025 – 12/2025

- Applied GIS-based suitability modeling to integrate demographic, geographic, and economic datasets assessing market suitability across 200+ regional zones for site-selection and expansion strategy.
- Built **opportunity heatmaps** visualizing market coverage gaps and competitive density, informing **go-to-market prioritization** and resource allocation decisions.

SKILLS

- **Programming & Tools:** Python, SQL, Excel, MATLAB, Git, Pandas, Matplotlib
- **Business & Analytics:** Business Analysis, Requirements Gathering, Stakeholder Management, Data-Driven Decision Making, KPI/Dashboard Reporting, Cross-Functional Collaboration
- **Spatial & Location Intelligence:** GIS, Spatial Statistics, Geospatial Cloud Computing, Location Intelligence, Urban & Housing Policy Analysis
- **Data Visualization:** Pandas, NumPy, Matplotlib, Searborn, Tableau, Quicksight, PowerBI, Looker
- **Modeling:** Machine Learning Fundamentals, Predictive Modeling, Model Evaluation, A/B Testing & Experiment Design
